DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:
Formula I to Formula III. The species are independent or distinct because the core moiety chemical structure contains constituents with groups that may induce variable properties, characteristics, and susceptibilities due to reactive groups contained in the specific group. For instance, the variable limitations disclosed in instant claim 1 require a further species election.
2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, 13, and 15 are generic.
3. The species are as follows:
4. X must represent either a **trimethylammonio** group or a **carbamoyl** group
5. Y must represent either a **hydrogen** or an **acetyl** group
6. q is dependent upon the specific designation of X and must be enumerated either zero or one.
7. Applicants' must choose one specific moiety represented by one compact formula. For instance, the moiety disclosed in instant claim 3 adequately represents a clearly designated species according to the limitations of instant claim 1.
8. Also, applicants' are required to elect from the species in instant claim 13 and 15, respectively. Applicants' are required to elect one shaped body, e.g., pretzel. Similarly, applicants' are required to elect one specific edible material, e.g., peanut butter.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
